Since 2018

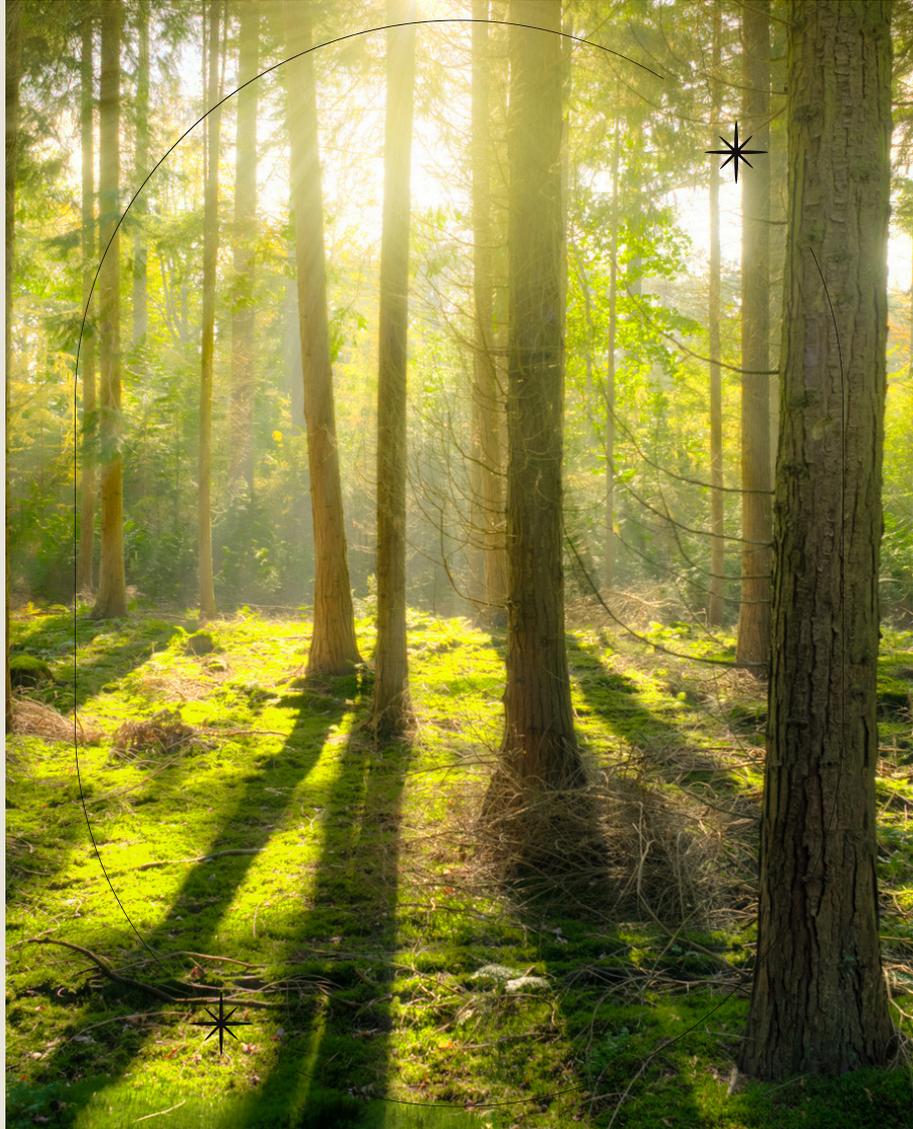

CR Furniture Co.,Ltd is one of the biggest wood door factory that operating 6 years in Rwanda. CR Furniture is an overall wood door customization enterprise integrating design, research and development, manufacturing and sales. We fully understand the preferences and needs of our customers to create unique wood doors.

About US

* CR Furniture has been working hard and accumulating, innovating in design and relying on production. CR Furniture has the ability to design and produce wood door products that span multiple styles, cultures, and materials. The products vary from person to person, fully demonstrating personality, beauty, quality, and harmony. With excellent product quality and excellent customized brand concept, CR Furniture's customers range from real estate to owners, from hotels to clubs, and span all walks of life. *

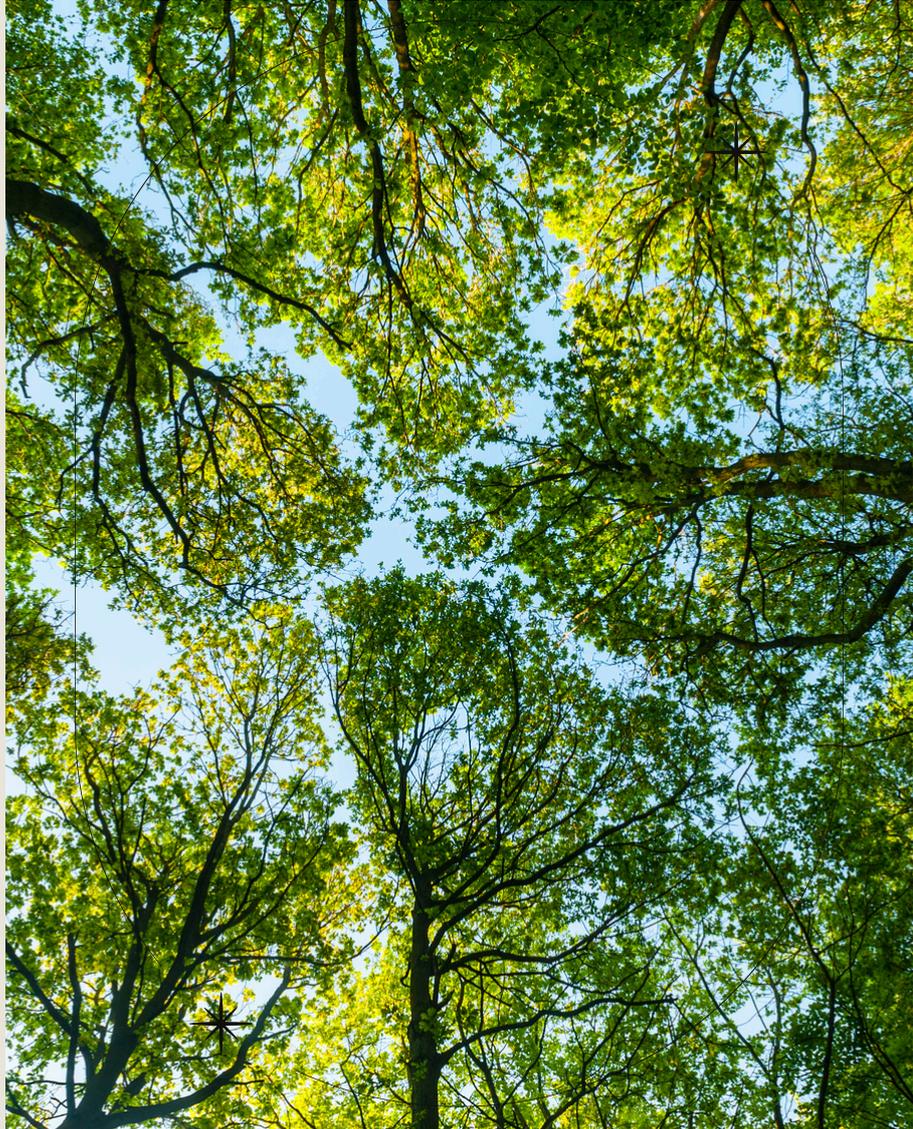

Listen to it

Green Life

A tree, too mighty to lock one's arms around, sprouts from a tiny little seed. A temple, towering nine storeys high, rises from a handful of clay. A journey of a thousand miles begins with a single step. Since 2018, we have been using only the highest quality timber, which is meticulously manufactured, to create a pleasant atmosphere in our customers homes.

Nature

Living in harmony with nature is truly invaluable. This is proved by the richness of the forests that, are part of our environment. We live, and create, together with them. We have been endeavouring to make products with high added value from the riches of the forest since 2018. Of course, it is also our responsibility to repay the forest, - with all the due diligence of a good master - for everything that they bestow upon us. Therefore, the forest must be respected and loved, and it is our desire that you feel the same way, too. Let the song of the forest resound in your home as well!

Minimal Style

Minimalism has long been a popular style, and this trend is now present in almost all areas of life. Characteristic features of minimalist interiors: a lot of free space in the house or apartment; a light color palette; a little decor and accessories and strict geometry, simple shapes. CR Furniture offers modern doors in a minimalist style without unnecessary elements, which will suit every interior.

Signature

Automated

CNC Machine

Our CNC (Computerized Numerical Control) machine is suitable for cutting, two-dimensional engraving and three-dimensional engraving on various plane materials. It is powerful, multi-purpose, whether it is to produce wood, stainless steel, titanium, aluminium and other metal surface engraving, engraving patterns and art graphics and crafts, it can be easily done.

Plywood

Plywood doors are made from multiple layers of thin wood veneers that are glued together, resulting in a strong and sturdy material. Compared to solid wood doors, plywood doors are more cost-effective, resistant to warping, splitting, and cracking, and have better insulation properties.

Pine Wood

Pine has distinctive wide grain patterns with irregular knots and flaws that make interior pine doors unique and this is magnified because the colour differences between darks and lights is greater than many other woods. No two doors made from real pine are the same and that is a rare quality in today's commercialised world.

Material

TYPE

Ribuyu

Ribuyu is a beautiful African hardwood known for its rich reddish-brown colouration and distinctive grain patterns. With its rich reddish-brown colour and attractive grain patterns, Ribuyu wood creates a warm and inviting atmosphere in any space. These doors have gained popularity in both residential and commercial properties, thanks to their timeless aesthetic appeal.

Muvula

With phenomenal natural outdoor resistance, gorgeous exotic golden brown hues and rock-hard density, Muvula is a firm favourite for home improvers and commercial specifiers. It's a strong, dense and very durable hardwood timber that is suitable for a variety of purposes ranging from veneering and flooring to door making.

Material

TYPE

The wooden doors for interiors are particularly solid, they do not cause privacy problems, they do not reveal so clearly the presence of handprints or other imperfections that, instead, the glass could highlight.
